

Call for Experts IO-Link Gateway Management

As a consequence of the growing number of IO-Link gateway applications such as JSON, OPC-UA, Webserver, etc. besides fieldbus integrations, a robust coordination of these clients is required to avoid access conflicts to the IO-Link Master interface with respect to realtime data exchange, data consistency and security. Therefore, a new working group "IO-Link gateway management" is looking for experts, who are willing to contribute actively their experience and requirements in this field.

All interested member companies are invited to join this working group. Please sign in if you are interested until **April 30th, 2019** via e-mail to juergen.maul@siemens.com.
